Motivated team player seeking a career in software development. Adaptable and quick-learning individual ready to apply both technical skills and skills in customer service and effective communication.

Education

Indiana University Bloomington, Bloomington, IN 2016
Bachelor of Science in Informatics with focus in Communication and Culture

The Mill Code School, Bloomington, IN Fall 2020
Ten week intensive online coding and business skills bootcamp. Received training in full-stack web development technologies, programming, and business soft skills.

Skills

- HTML, CSS
- Javascript, PHP
- Java
- Python
- Photoshop/Gimp
- Illustrator/Inkscape
- Bicycle Repair/Maintenance
- Bicycle Wheelbuilding

Work Experience

Bikesmiths Bicycle Shop, Bloomington, IN March 2017 - Present
Mechanic, Sales Associate
Service and repair customers' bicycles including tune-ups and adjustments, part and accessory installation, and wheelbuilding. Sell bicycles, parts and accessories while Identifying customer needs and compatibility issues. Answer customer questions utilizing industry knowledge both in store and via phone.

Indiana Memorial Union Catering, Bloomington, IN July 2016 - March 2020
Bartender
Mixed and served drinks including cocktails, beer, wine, and soft drinks to guests in a fast-paced environment at events on and around the IU campus. Worked both alone and in teams to set up event spaces, manage inventory during events, and ensure on-time setup and smooth guest experience. Created recipes for custom signature and batched cocktails.

Red Yeti Brewing Company, Jeffersonville, IN August 2014 - May 2016
Server, Bartender, Assistant Brewer
Served farm-to-table cuisine and craft beer and cocktails in a small yet high-volume gastropub. Assisted with the making of craft beer in-house through all stages of the brewing process.

Dungeonist, LLC, Bloomington, IN May 2012 - March 2015
Co-founder, Web Developer
Built a social networking website for players of tabletop role-playing games while working remotely with a small team. Utilized skills in HTML, CSS, and PHP to build an adaptable character and campaign management platform on the open source Elgg platform. Designed user interfaces and performed user experience testing. Managed company social media accounts.
